RESEARCH INTERESTS

Market Design, Behavioral Economics, Experimental Economics, Healthcare Markets

EDUCATION

Aug 2019 - Present	PhD Candidate in Economics Lund University, Sweden Visiting PhD, Boston College , Sept 2022 - Feb 2023 (Host: M. Utku Ünver)
Aug 2016 - June 2018	MSc. Economics Lund University, Sweden
Aug 2007 - May 2011	B.A. Economics & Visual Arts Brown University, USA

RESEARCH

Truth-Telling in a Priority Pricing Mechanisms (*Job Market Paper*)

The paper investigates how truth-telling preferences influence consumer welfare in a Priority Pricing (PP) mechanism, using both theoretical and experimental methods. The findings reveal that PP's ability to enhance welfare depends not only on the incentives created by the pricing structure but also on the population's propensity for truth-telling and their beliefs about others' propensity for truth-telling.

Blood Supply Allocation: Trade-off Between Equity and Efficiency

This paper examines the trade-off between equity and efficiency considerations that emerges when allowing for ABO blood type compatible allocation. It derives the criteria for ensuring that blood pooling procedures aimed at achieving equitable allocation across blood types do not reduce the overall patient treatment rate.
